SHORT BIO. My research focuses on causal decision making (NeurIPS-25, Preprint, ICLR-26) and causal effect identification (NeurIPS-24). I investigate how to formally model diverse real-world problems within a causal framework and derive optimal decisions from such structured representations. In particular, I develop methods for robust decision-making in settings under environmental uncertainty (NeurIPS-25), domain shifts between training and deployment environments (Preprint), and even scenarios involving counterfactual actions (ICLR-26).

EDUCATIONS

Graduate School of Data Science, Seoul National University — Seoul, Republic of Korea
Integrated M.S. and Ph.D. in Data Science — Sep 2022 – Feb 2027
Advisor: Prof. Sanghack Lee.
Overall GPA: 4.02 /4.3; Ph.D. Qualification Exam partially waived due to outstanding academic performance.

Department of Mathematics and Statistics, Sejong University — Seoul, Republic of Korea
B.S. in Applied statistics and Mathematics (Double major), *Cum Laude* — Mar 2016 – Aug 2022
Advisors: Prof. Ji Eun Lee and Jin Hee Yoon. — (2 years military service)
Overall GPA: 4.04/4.5; Major GPA: 4.46 (Applied Statistics), 4.38 (Mathematics).

AWARDS AND HONORS

Graduate Student Instructor (GSI) scholarship | Seoul National University — Spring 2024, Spring 2025, Spring 2026
BK21 scholarship — Fall 2024, Fall 2025
First place merit scholarship | Sejong University — Fall 2020, Fall 2021
Fourth place award | The 9th College of Natural Sciences Academic Conference, Sejong University — Nov 2021
▷ Mitigating spurious regression in time-series data via Granger causality.
Third place award | The 8th College of Natural Sciences Academic Conference, Sejong University — Nov 2020
▷ The significance of the Euler's number and its applications.

ACADEMIC SERVICES

Conference Reviewer: 2026 UAI, ICLR, ICML, **2025** ICML

PROJECTS

Towards More Scalable Score-based Causal Discovery | LG AI Research — Sep 2025 – Aug 2026

- ▷ Leading a project on scalable score-based causal discovery algorithms. (First-author submission under review.)
  - Developed a novel operator enabling score-based causal discovery algorithms to escape local optima.
  - Investigating parallelization strategies for score-based causal discovery algorithms.

Hyundai NGV Data Boot-Campus 2025 | Hyundai Motor — July 2025 – Sep 2025

- ▷ Developed high-voltage battery performance prediction technology.

Hyundai NGV Data Boot-Campus 2024 | Hyundai Motor — July 2024 – Sep 2024

- ▷ Developed an intelligent system for predicting vulnerable regions of automotive body panel stiffness using differential geometry–based automatic curvature analysis.

Deep Reinforcement Learning for Recommendation Systems | Coursework Project — Mar 2024 – Jun 2024

- ▷ Developed a recommendation system based on DDPG, leveraging multi-modal item features (video, audio, and text) to improve recommendation performance.
  - Source code available at `github.com/MinwooPark96/ddpgRLRS`.

Optimal Mixed Policies Completeness | Oxford University — Aug 2023 – Feb 2024

- ▷ Studied complete characterization of conditions under which the intervention effect of a variable is positive. Acknowledged for helpful comments in Toward a Complete Criterion for Value of Information in Insoluble Decision Problems. *Transactions on Machine Learning Research* (TMLR), 2024.

TEACHING ASSISTENTS

Causal Inference for Data Science — Spring 2024, Fall 2024, Spring 2025, Spring 2026

- ▷ Topics included Bayesian networks and graphical causal inference.

Machine Learning and Deep Learning for Data Science II — Fall 2023

- ▷ Covered kernel methods, Gaussian processes, and related topics in machine learning.

Basic Mathematics for Artificial Intelligence (Undergraduate) — Spring 2022

- ▷ Covered linear algebra, basic statistics, and probability theory.

PROFESSIONAL TALKS AND POSTERS

Counterfactual Structural Causal Bandits

- ICLR 2026 poster session | Rio de Janeiro, Brazil — Apr 2026 (scheduled)

Structural Causal Bandits under Markov Equivalence

- ExploreCSR poster session | Seoul, Republic of Korea — Dec 2025
- NeurIPS 2025 poster session | San Diego, USA — Dec 2025
- JKAIA 2025, NeurIPS preview session | Seoul, Republic of Korea — Nov 2025
- SNU GSDS student research seminar | Seoul, Republic of Korea — Apr 2025

Complete Graphical Criterion for Sequential Covariate Adjustment in Causal Inference

- NeurIPS 2024 poster session | Vancouver, Canada — Dec 2024
- SNU GSDS student research seminar | Seoul, Republic of Korea — Dec 2024
